

**TERREBONNE PARISH  
COASTAL ZONE ADVISORY COMMITTEE  
MITIGATION PROJECTS**

---

1/15/03

**Proposed Project Location:**

Liza Pond, D-Boudreaux Unit

T19S-R17E, Section 87, 82, 15

T20S-R17E, Sections 37, 1, 2

**Problem:**

Vanishing Marsh

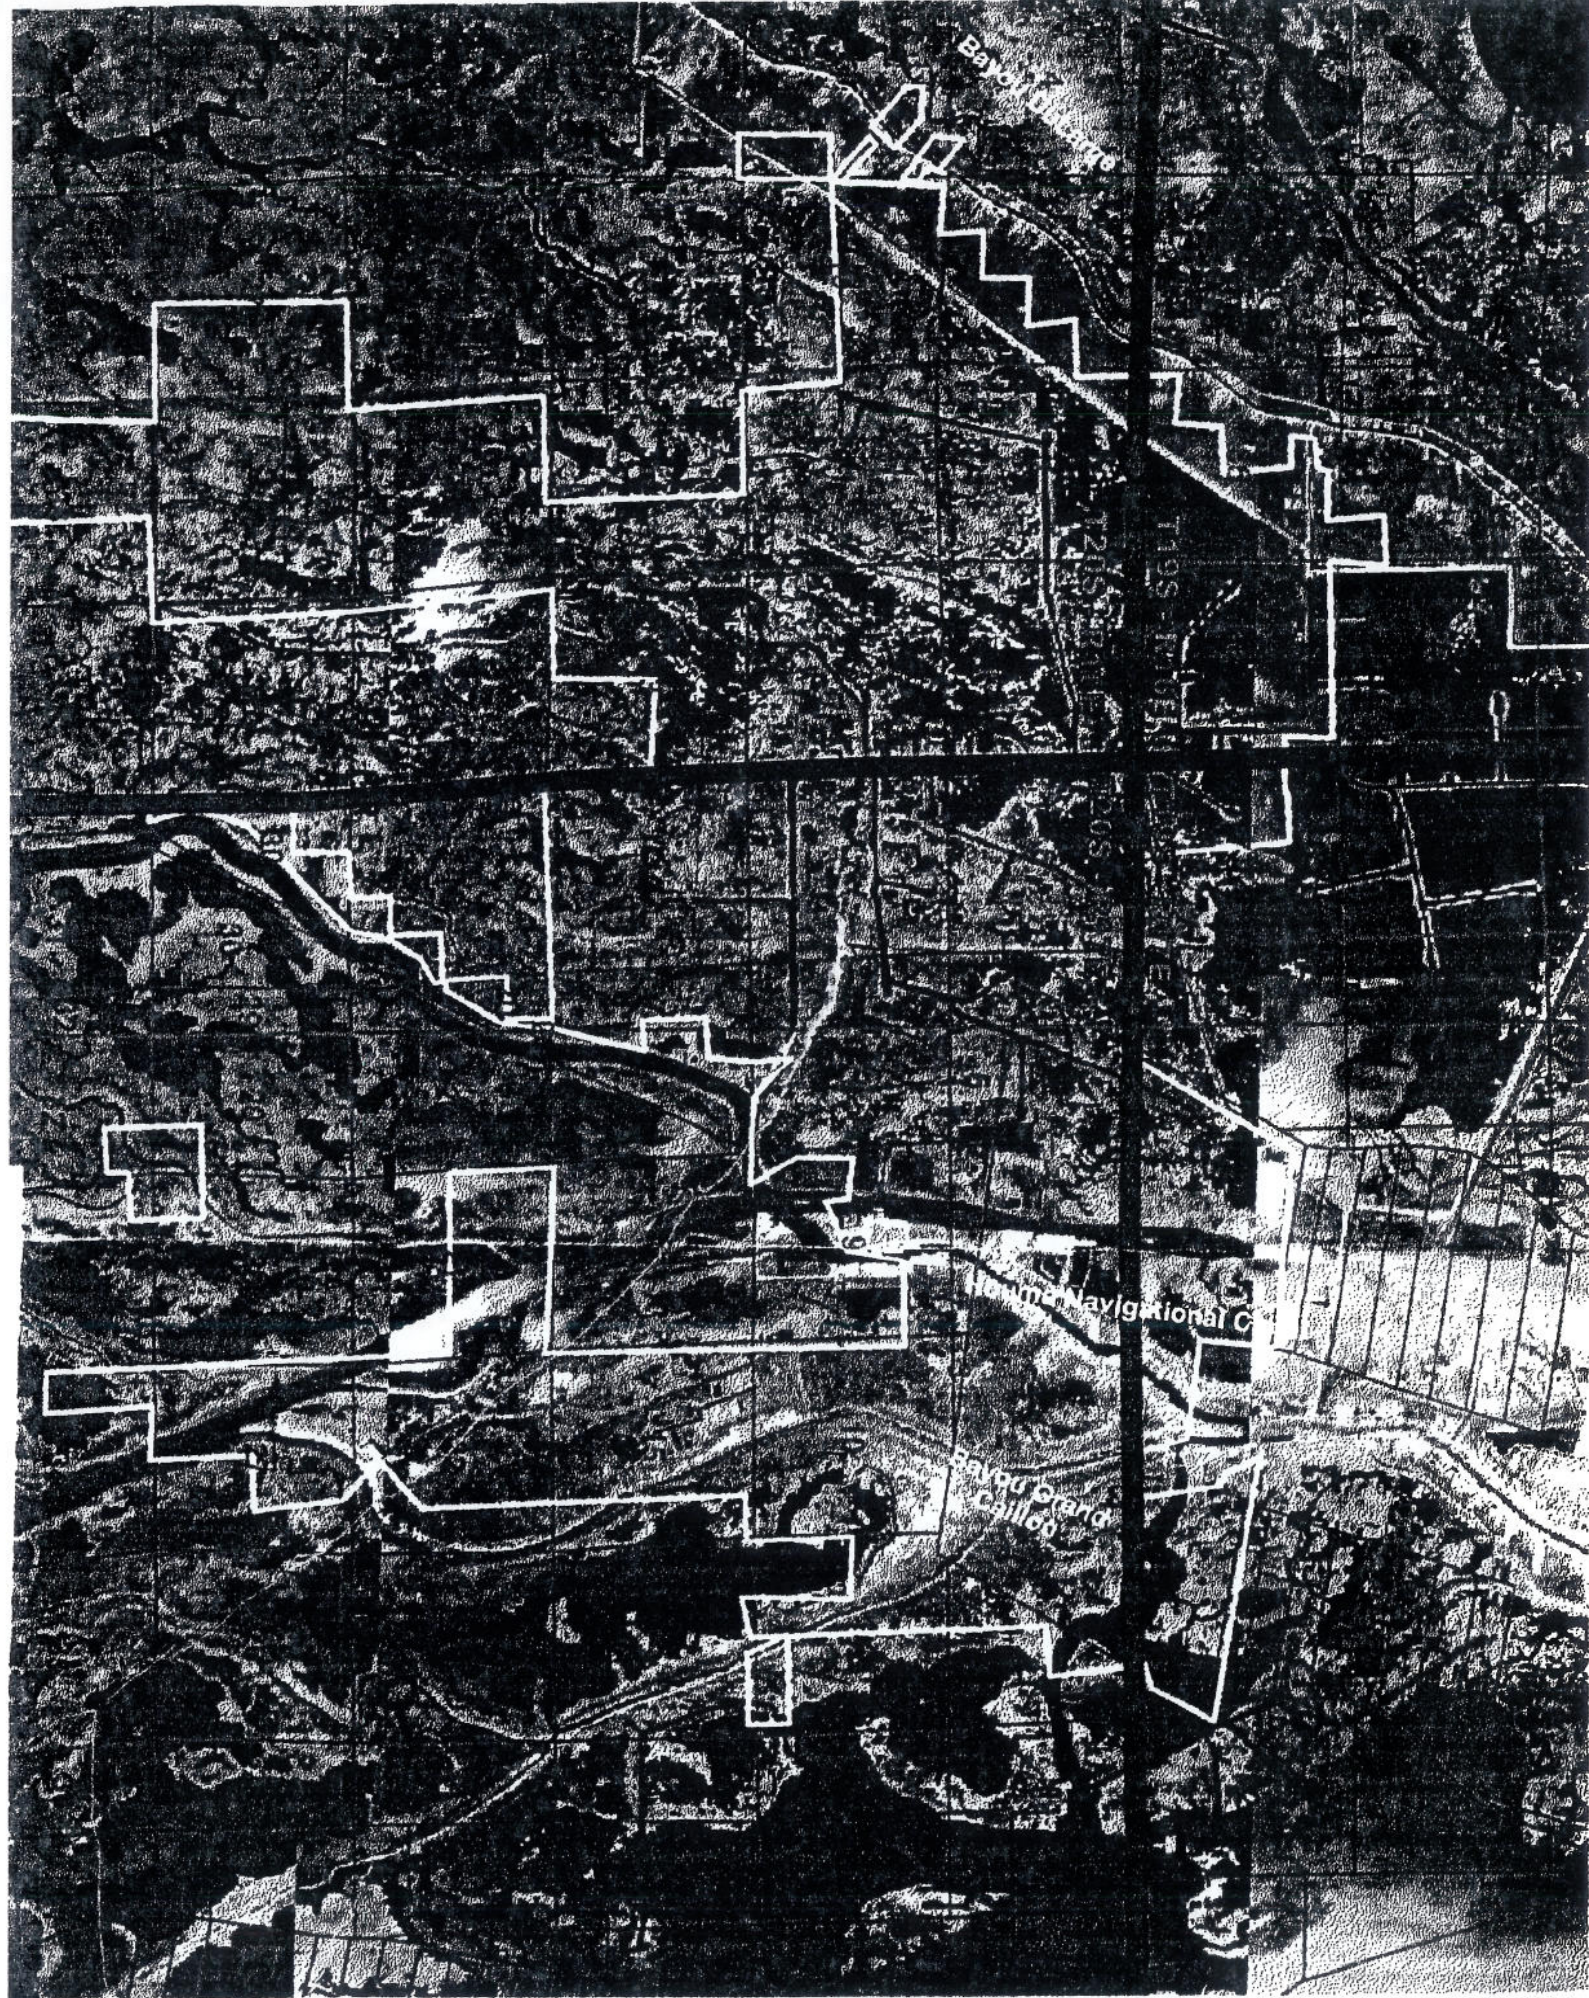

Note: Oilfield canals cut through Bayou Dulac northward. LL&E plugged and abandoned tank battery and wells – canals left open north where tank battery was right below Lake Gero. Pond had only one water entry off Bayou Dulac in 1953. One way in, one way out only.

System Needs

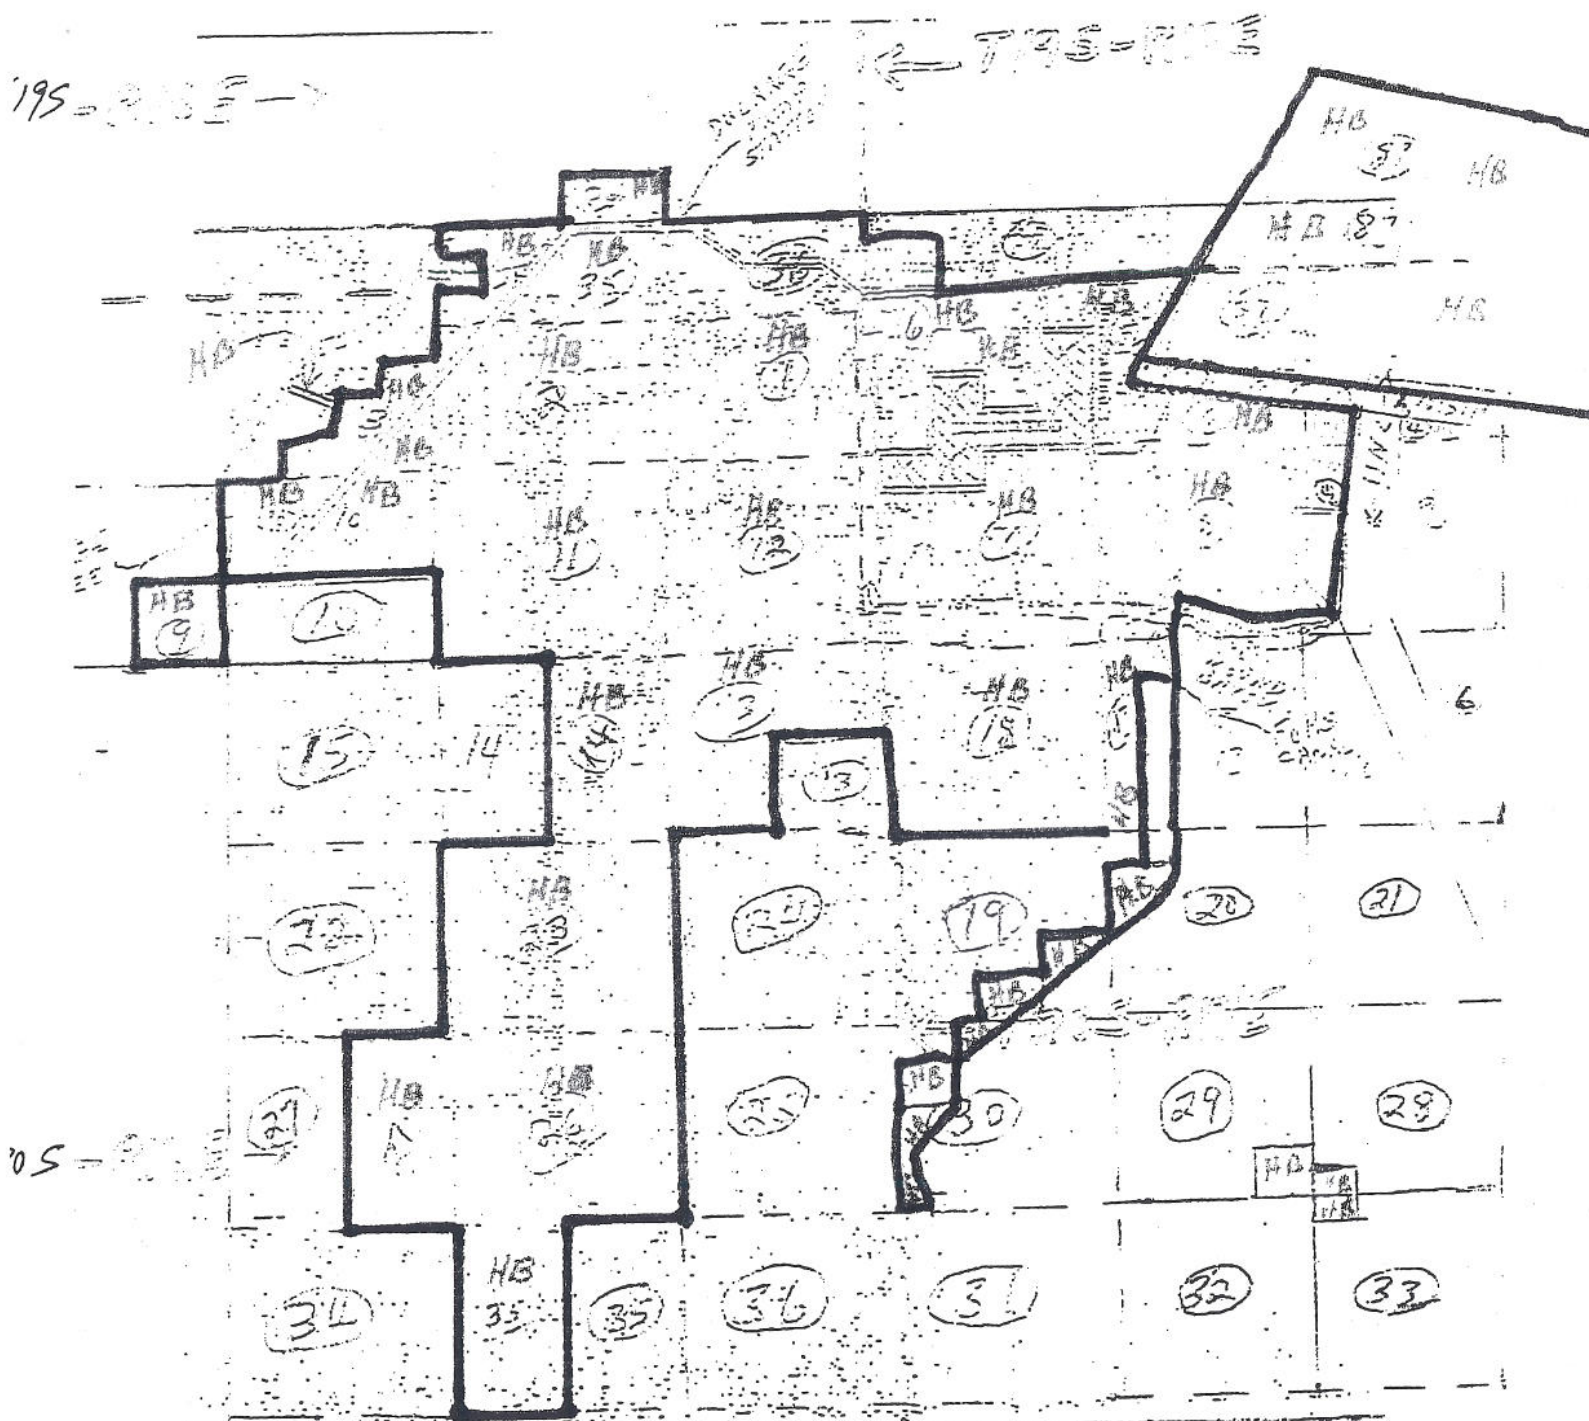

- 1) Shoreline protection
- 2) Closure of man-made canals around pond and entry from Bayou Dulac
- 3) Marsh would benefit from fresh water heads off Bayou Dulac by way of Bayou Grand Caillou and Hourn Navigation Canal
